

ZERO-FOOTPRINT PACS/RIS

IntellaPACS is an innovative single-platform PACS/RIS solution that delivers superior medical imaging and advanced workflow management driven by a zero-footprint, 100% cloud-based architecture.

IntellaPACS is designed for ultimate simplicity without compromising function, features or capabilities. The robust platform allows access virtually anywhere, anytime with a reliable, single-point access to patient information.

- ✓ Increase Efficiency
- ✓ Reduce Administration Time
- ✓ Streamline Workflow Management
- ✓ Access Anywhere, Anytime
- ✓ Fast, Reliable and Secure

INTELLAPACS'S KEY FEATURES:

- Advanced Toolset for Rapid Image Optimization
- Zero-Footprint, 100% Cloud-Based Architecture
- No Software Download Required for Users
- Powerful Workflow Engine and Real-Time Worklist
- Simple Administration with Role-Based Users
- Unlimited Users, Workstations and Facilities
- Customizable Reports and Results Tracking
- Seamlessly Embedded Speech Dictation

INNOVATIVE MEDICAL IMAGING

Traditional PACS/RIS systems require a significant, upfront capital investment in computer hardware, software, custom programming and IT support. IntellaPACS has developed a simple-to-use, device-agnostic platform to maximize all the benefits of a robust, 100% cloud-based infrastructure without large capital investments and long-term IT maintenance concerns.

READ FROM ANYWHERE

IntellaPACS solutions streamline operations with a powerful workflow engine and real-time worklist for multi-site reading while providing consistent viewing environments for radiologists. Whether conducting preliminary or final reads, IntellaPACS understands that receiving the images with original quality and returning the report in a timely manner is the most critical part of the workflow.
